SUMMARY

Backend Developer specializing in Java, Spring Boot, and Microservices Architecture. Hands-on experience in distributed systems leveraging Apache Kafka, Docker, and CI/CD pipelines. Looking to apply software architecture and data engineering expertise to high-scalability challenges.

SKILLS & CERTIFICATIONS

Languages: Java 17/21, C, Kotlin, HTML, CSS, JavaScript

Backend & Frameworks: Spring Boot 3, Spring Security, JPA/Hibernate, Thymeleaf, Flutter, Svelte, Bootstrap

Architecture & DevOps: Microservices, Clean Code, SOLID, Docker, GitHub Actions (CI/CD), Linux, RESTful APIs

Messaging & Databases: Apache Kafka, SQL, MySQL, PostgreSQL, H2 Database

Certifications: Java Cloud Native (Bradesco/DIO) | Google AI Essentials (Coursera)

EXPERIENCE

Vivo (Telefônica Brasil) **Sep 2025 - Present**
Backend Developer Intern | Development & Data Porto Alegre, RS, Brazil

- Led the refactoring and optimization of a routine management application, achieving up to a **98% reduction in response time** (from 45s to 1s) and significantly enhancing system scalability.
- Engineered and deployed a supply management system that reduced team operational time by **75%** (from 8 hours to 2 hours daily), resulting in the complete decommissioning of an inefficient legacy software.
- Developed an audit solution for managerial visits that increased process compliance from **22% to 100%**, integrating automated email workflows and action plans to enforce regional operational standards.
- Collaborated in an agile (Scrum) environment leveraging Power Platform, Power BI, SQL, and data integrations to support executive decision-making.

HW Center Produtos Hospitalares **Jul 2024 - Dec 2024**
IT Helpdesk & Infrastructure Porto Alegre, RS, Brazil

- Diagnosed and resolved IT infrastructure incidents, ensuring high availability of mission-critical systems.
- Conducted preventive hardware and software maintenance across an enterprise environment.

FEATURED PROJECTS

AutoGrid - Catalog System [Repository]
Stack: Java 21, Spring Boot, Apache Kafka, WebSockets, Docker, Spring Security

- Event-driven architecture built with **Apache Kafka** for real-time notifications, ensuring high availability.
- Fully containerized development environment using **Docker Compose**.
- Implemented secure access control and authorization policies with Spring Security.

FURIA Hub - Mobile & DevOps [Repository]
Stack: Flutter, GitHub Actions, JSON, REST Integration

- Implemented automated **CI/CD pipelines with GitHub Actions** for build and testing automation.
- Consumed and processed complex JSON payloads for dynamic statistics rendering.

EDUCATION

B.S. in Computer Science (5th Semester) **Expected Dec 2027**
UniRitter Porto Alegre, RS, Brazil

Associate Degree / Technical Course in IT **Completed in 2024**
Escola Técnica José César de Mesquita Porto Alegre, RS, Brazil
